

# CHRISTOS XENOFONTOS

---

The Cyprus Institute, 1645 Nicosia, Cyprus • c.xenofontos@cyi.ac.cy

## PROFILE

---

Marie Skłodowska-Curie Actions (MSCA) Fellow and PhD candidate in Atmospheric Sciences at The Cyprus Institute. Associated Member of CERN (2023–2026). Research focuses on upper-tropospheric aerosol formation, Earth system modeling, and aerosol–cloud interactions. Published in high-impact journals including *PNAS* and *Nature*, and reviewed manuscripts for *Environmental Science & Technology*. Strong programming, data analysis, and high-performance computing skills.

## EDUCATION

---

### THE CYPRUS INSTITUTE, Nicosia, Cyprus

*PhD in Energy, Environment and Atmospheric Sciences*

2023 – 2026

Research Project: Anthropogenic NH<sub>3</sub> in the Upper Troposphere: Impacts on Global Particle Formation and the Asian Tropopause Aerosol Layer

### UNIVERSITY COLLEGE LONDON, London, England

*MSc Planetary Science*

2021 – 2022

Degree Classification: Distinction

Research Project: Simulating the performances of ARIEL and JWST in probing the Atmospheres of Planets in the Radius Gap

### IMPERIAL COLLEGE LONDON, London, England

*MSc Physics*

2020 - 2021

Degree Classification: Distinction

Research Project: Inertial Stability and the Behaviour of Tropical Cyclones

### IMPERIAL COLLEGE LONDON, London, England

*BSc Physics*

2017 - 2020

Degree Classification: Upper Second Class Honours

Research Project: Sonoluminescence- Generating Light from acoustically-driven bubbles

## RESEARCH ACHIEVEMENTS & PEER RECOGNITION

---

### Achievements Summary

Quantified the global impact of anthropogenic ammonia (NH<sub>3</sub>) on upper-tropospheric new particle formation using Earth system modeling constrained by CLOUD chamber measurements. Demonstrated that convectively transported NH<sub>3</sub> significantly enhances aerosol formation through interactions with sulfuric and nitric acids. Model simulations show increases of up to 2.5× in cloud-forming particle concentrations over high-emission regions and up to 80% increases in aerosol optical depth, with implications for cloud radiative effects and climate forcing. This work advances NH<sub>3</sub>-driven nucleation representation in global models and informs climate-relevant policy assessments.

## Secondments

1. **CERN CLOUD experiment.** Supported experimental campaigns through night shifts and contributed to planning discussions (Geneva, 2023-2026)
2. **Airmodus Ltd.** Three-week secondment to enhance the Airmodus PSM inversion tool in Python, improving user interface legibility, adding error metrics, and refining data visualization (Helsinki, 2024)
3. **Max Planck Institute for Chemistry.** Two-month collaboration developing the EMAC model setup for simulating atmospheric particle formation and evaluating its climate impact (Mainz, 2023)

## Awards and Recognition

1. **Press/Media recognition:** PNAS social media channels, World News (WN), AZoCleantech, and MSN (2025)
2. **Marie Skłodowska Curie Actions (MSCA) CLOUD-DOC Fellowship (EU-2023)**
3. **Ogden Prize:** Awarded annually to **one student** to recognise outstanding achievement in the **Communicating Physics** course. (Imperial College London - 2019)
4. Because of the Ogden Prize, my name was written into the memory of the magnetometer instrument of the Solar Orbiter spacecraft. (Imperial College London - 2019)

## Conferences

1. **COMECAp.** Oral presentation on *Impact of Anthropogenic NH<sub>3</sub> on UT Aerosol*, Nicosia, Cyprus (2025)
2. **ICNAA.** Oral presentation on *Impact of Anthropogenic NH<sub>3</sub> on UT Aerosol. Session Chair*, Vienna, Austria (2025)
3. **EGU General Assembly.** Oral presentation on *Anthropogenic NH<sub>3</sub> Impact on UT Aerosol Composition and Climate Forcing*, Vienna, Austria (2025)
4. **EAC.** Oral presentation on the *impact of NH<sub>3</sub> on particle formation in the Asian Tropopause Aerosol Layer*, Tampere, Finland (2024)
5. **EGU General Assembly.** Poster on *Modelling the Impact of NH<sub>3</sub> Emissions on NPF in the Asian Monsoon UT*, Vienna, Austria (2024)

## POSITIONS OF RESPONSIBILITY

---

### THE CYPRUS INSTITUTE

#### *Student Representative*

Nicosia, Cyprus

2024-2026

- Represented student interests at the Graduate School level, participating in academic and institutional decision-making
- Organized student-led events, fostering academic engagement and community-building
- Supported student well-being and productivity through peer outreach and feedback mechanisms

### CLOUD COLLABORATION

#### *CLOUD-DOC Student Representative, Paper Committee*

CERN, Switzerland

2023-2026

- Reviewed and provided feedback on student paper drafts to uphold scientific clarity
- Ensured accuracy of author lists, affiliations, and acknowledgements across CLOUD publications
- Represented doctoral students in discussions with senior researchers on publication planning and policy

### CHELSEA ACADEMY

#### *Teaching Assistant*

London, England

2019

- Spent 3 hours teaching the students every week for 3 months
- Guided final year physics students to win gold and silver medals in Physics Olympiads

## ADDITIONAL SKILLS

---

- **Programming & Modelling:** Python, Fortran, SQL, Earth system model development (EMAC), HPC environments, Unix/Linux
- **Software & Tools:** Microsoft Office (Word, Excel, PowerPoint), Git, LaTeX
- **Languages:** Greek (native), English (native), French (IGCSE)
- **Certifications:** Python Programming – Coursera & Python Institute Certified
- **Other:** Experience with large-scale simulations, data analysis, and collaborative research workflows
